

Hsiaolin Hsieh

Curriculum Vitae

650-924-7226, hsiaolin@stanford.edu, <https://hsiaolin.net/>

Dr. Hsiaolin Hsieh (she/her) is a post-doctoral researcher at the SCALE Initiative, Stanford Accelerator for Learning. Her research focuses on ensuring equitable opportunity and access to learning for multilingual learners. Specifically, her dissertation uses natural language processing and large language model to analyze complex student dialogic participation in the classroom. Formally trained in educational measurement and assessment, she has extensive experience in the design, implementation, and evaluation of tests in the K-12 context. Her involvement in experimental research supporting elementary students' literacy has equipped her with the knowledge and skills for large-scale data collection and advanced quantitative methods. Her background in educational technology enables her to examine and leverage alternative tools to assist student learning. Through long-term, research-practice partnerships, she has supported school districts in identifying and removing barriers that limit multilingual learners' equitable access to grade-level mathematics and English courses. As a mixed-methods researcher, she uses both qualitative and quantitative data collection and analytical approaches that include interviews, think-aloud and classroom observation protocols, surveys, coding procedures, statistical modeling, natural language processing, and deep learning. In her work, she collaborates continuously with stakeholders in local education systems, including teachers, instructional coaches, school and district administrators, and philanthropic foundations.

EDUCATION

Ph.D., Stanford University	2024
Developmental and Psychological Sciences, Graduate School of Education	
M.A., Stanford University	2013
Learning, Design, and Technology, Graduate School of Education	
M.A., National Central University, Taiwan	2010
English and American Literature	
B.A., National Chengchi University, Taiwan	2005
Journalism	

CERTIFICATIONS

Certificate in NAEP High School Transcript Study (HSTS) Data Training Workshop , National Center for Educational Statistics & National Assessment of Educational Progress	2023
Certificate in Research Practice Partnership , Stanford University	2022
Diploma in Teaching Chinese as a Foreign Language , National Taiwan University, Taiwan	2011

AWARDS AND GRANTS

- Research-Practice Partnership Award conferred by the California Educational Research Association (with the Tri-District Math Pathways Trajectories team).
November 15, 2023
- “Probing with *LogoSearch*: Research on Equity and Fairness in Linguistically Diverse Classrooms.” Recipient of Technology for Equity in Learning Opportunities (TELOS), \$7,500 (Stanford, 2019)
- Co-founder of “Learning, Assessment, Measurement and Analytics at Stanford (LAMAS)”
Recipient of the GSE Community Organization Fund, \$2,045 (Stanford, 2019)
Recipient of the VPGE Student Projects for Intellectual Community Enhancement (SPICE) grant, \$850 (Stanford, 2019)

PREVIOUS EMPLOYMENT

September 2018 – June 2024

Graduate Research Assistant, Stanford University

With my primary advisor, Prof. Guillermo Solano-Flores, we examine the linguistic, cultural, and trans-semiotic aspects of computer-administered large-scale tests in the K-12 context. This work addresses the need for the optimal design of accessibility resources provided to students with disabilities or English learner students. Through long-term, research-practice-partnership projects, we worked with district leaders to identify and eliminate the systemic factors in instructional and assessment practices that limit multilingual learners’ secondary school success—the opportunity and access to grade-level mathematics and English courses, learning support, and, ultimately, the eligibility for college admission.

With my co-advisor, Prof. Sarah Levine, we collaborated on an intervention study that supported high-school students’ writing in English classes by using Google Speech-to-Text technology. I worked with teachers and students collaboratively to explore and reflect on the potential and

limitations of using voice typing in different writing activities (e.g., brainstorming, drafting, revising, peer-reviewing).

I also worked closely with Prof. Rebecca Silverman on her 5-year IES grant project—Cultivating Linguistic Awareness for Voice and Equity in Schools (CLAVES), and a service-learning program, Ravenswood Reads, with the Stanford Hass Center for Public Service. These RCT studies implemented and evaluated the language- and student-centered curricula targeting elementary students' language and literacy skills. I served as the assessment specialist and data analyst, coordinating data collection and analyzing large data sets from multiple schools and school districts in California.

April 2013 – August 2018 (internship between April 2013 -Aug 2013)

Director of Technology, Data, and Systems: Understanding Language Initiative, Stanford University

- Responsible for MOOC production and management (curriculum design, video production, operating platforms and courses, data management, IP licensing), and directing the research and development of course-related databases and applications, and grant proposal writing.
- Developed and managed about 30 offerings of MOOCs and 11 learning modules.

I led the research and development of a classroom discourse platform (*LogoSearch*) which collects and provides thousands of real-life student-to-student dialogues for researchers and practitioners to improve teaching and learning. I was engaged in and responsible for projects supporting our educator PD program (Hewlett Foundation; Gates Foundation); in translating College-and-Career Ready standards into classroom applications (Smarter Balanced Assessment Consortium; ELPA21 Consortium); in linguistic research (Education Testing Services (ETS); TELOS); in employing micro-credentials to enrich adult learning opportunities (Carnegie Corporation of New York; Digital Promise); and in developing educator leadership in the K-12 system (WestEd). In this role I had the opportunity to accumulate a wealth of skills and experience in a wide variety of learning contexts supporting K-12 educators.

—

August 2010- August 2012

Primary Liaison and Organizing Officer for the Fourth International Conference on Sinology:
Academia Sinica, Taiwan

- Planning of the program and schedule, managing the conference information system, budget control, and overseas and domestic liaison and communications.

—

September 2007- July 2009 (part-time while studying for an M.A.)

Project Coordinator and translator for the TEI Localization Project: Academia Sinica, Taiwan

- Full Chinese localization of the TEI/XML standard, published in 2009 with Weining Wang and Hsi-chin Jung, edited by Marcus Bingenheimer.

—

August 2005 - August 2006

Research Assistant of the National Digital Archives Program (subsequently the Taiwan E-Learning and Digital Archives Project): Academia Sinica, Taiwan

- Published Chinese Classics Full-text Database Digitization Procedures and Guidelines; organized and interpreted at TEI workshops.

SKILLS

- Mixed methods research approaches in educational settings (including, focus groups, survey design and analysis, qualitative coding, quasi-experimental research design, statistical modeling, text mining, natural language processing, and machine learning).
- Statistical analysis and text mining (R and Python).
- Grant proposal writing and project management.
- Knowledge of intellectual property, licensing, research, and IRB clearance issues, especially with regard to the production, administration, and management of online learning materials and to working with minors.
- Learning Management Systems (LMS), Drupal, and related technologies.
- TEI/XML mark-up and associated technologies, and varying familiarity with computer programming languages (including HTML and CSS, etc.) and technology stacks.
- Multimedia skills, including digital content production, website management, traditional and digital photography, and computer graphics.

LANGUAGES

- Fluent English
- Native Mandarin, Taiwanese, and Hakka (my mother tongues)
- Intermediate Japanese

SELECTED GENERAL EXPERIENCE

- Conference and workshop organizing, including a major international conference in Sinology at Academia Sinica in Taipei, and a series of international workshops on TEI as part of the TEI Chinese Localization Project and TELDAP (Taiwan E-Learning and Digital Archives Project, a major Government-funded project to promote digital education and research in Taiwan).
- Teaching Chinese and English as second languages, both in classroom and private-tutoring environments.
- Learning games design and playtesting (intern for Kidaptive, Inc., 2012).
- Many years as a freelance writer, journalist, and graphic artist (in Chinese), including regular contributions to *The Humanistic Education Journal* (Taipei) and a long-running illustrated column in the *China Daily News*.
- Editorial and research assistantships (including at Taiwan's National Central University, and for the East-Asian poetry journal *Full-Tilt*, 2007-2009).
- Extensive experience as a translator and interpreter, including freelance work for (then-) President Ma Ying-Jeou of Taiwan, the respected literary journal *The Chinese PEN*, and internationally renowned film director Tsai Ming-liang.
